

AETERNUS LUX MODULAR 2.2 SYSTEM

Description:

The Aeternus Lux Modular 2.2 system is designed for home-theater and sound designing purposes. The design goals include low fatigue, portability and modularity, THX standard SPL levels, great low end response, compatibility for a future 5.1 system, and last but not least “classy” aesthetic.

Features:

- +/- 1.5 dB from 75Hz to 20kHz
- Main f3 of 65Hz, Sub f3 of 25Hz
- Great horizontal off axis
- Uses cascaded active to passive crossover to separate sub and main signal
- Inset tweeter to reduce lobing issues presented with MTM design
- Side firing, bottom ported sub maintain sleek aesthetic

- Main
- Sub
- 30 Degrees off axis
- 60 Degrees off axis
